## **“Ending the scandal of complacency”**

### **Transport Select Committee Report**

IHIE welcomes the Select Committee’s calls for a broad systems driven approach to improving our road safety strategy and for locally-set priorities and delivery mechanisms.

“Many different professionals are involved in delivering road safety information, education, engineering and enforcement. They need to train and work together more to improve mutual understanding and effectiveness as such as the Thames Valley Partnership does (Surveyor, 30 October).

That’s why IHIE is backing the Devon academy and looking to identify core learning and competences across the disciplines to drive up standards and to develop career structures attractive enough to bring in new recruits.” said IHIE President Tony Sharp.

– END –

#### **Notes for Editors**

1. IHIE is the professional qualifying institution for specialist engineers (CEng, IEng and Eng Tech) delivering sustainable transport in the UK.
2. IHIE evidence to the Transport Select Committee draws attention to the transport skills shortage:
