IHIE Traffic Sign Structures Guide (2008)

IHIE's definitive guide on applying the EN design standards has been fully revised. This second edition takes on board the 2007 BS EN 12899-1: 2007.

Guide Editor, Simon Morgan, Buchanan Computing, said, "The bulk of the guide is intended for traffic and highway engineers who now have to specify what wind pressure each sign needs to withstand. This is an additional step in the design process that the guide explains."

The Guide is free and can be downloaded from www.ihie.org.uk or sent on receipt of an A4 s.a.e. with £1.50 stamps.

- END -

Notes for Editors

1. *IHIE is the professional qualifying institution for specialist engineers (CEng, IEng and Eng Tech) delivering sustainable transport in the UK.*
2. *The guide was co-authored by James Gallagher, Highways Agency, Kirsten Morris, Mott MacDonald and Simon Morgan.*
First edition published September 2007.
Second edition published May 2008.
