

# All Signals Green!

Celebrations were taking place at Transport for London following news that 15 of the organisation's Trainee Traffic Control Engineers had passed their IHIE Foundation assessment.

The trainees are employees within TfL's Directorate of Traffic Operations and are training to be Signals engineers. The passing of this assessment which covers a wide spectrum of traffic signal control such as risk assessment, project management, spec writing, modelling, site observation, traffic management and commissioning also entitles the trainees to become IHIE members.

Korak Van Tuyl, Principal Engineer for the North Inner Signals team and part of the training co-ordination team said, "The assessment is intensive and demanding so we are extremely pleased that all 15 candidates passed the assessment. It included a 20 page report backed up by a substantial evidential document on works they have completed on a range of schemes such as a new installation of a Pelican, VA Timing Review and Signal MODS sites and then culminating in an interview."

Pic shows 5 out of the 15 trainees who passed their IHIE Assessment. From left to right: Dash Keerthichandra (North East Signals Team), Pa Bunn (North West), Elizabeth Slack (North Inner), Thomas Tompkin (South Inner) & Peter Gocke (North West). Other successful candidates were Joe Bowkley (NI), Kwame Senyah (NI), Tracey Hudson (NI), Helen Mott (NW), Adam Wratten (SI), Ravesh Permala (SO), David Brown (South Outer), Richard Booth (NE) Ngozi Manyo-Plange (NI) and Jack Pulker (SO).
