IHE MERCIA BRANCH - NATIONAL AWARDS 2019

Thursday 23rd May 2019 - The Holiday Inn, Birmingham

INVITATION TO ENTER

Large Project of the Year

Awarded to the team responsible for the delivery of a large project (over £1m) within the United Kingdom relating to any highway, traffic or transport related project i.e. highway maintenance scheme or new transport infrastructure/improvements scheme. The project will need to show how it has made a significant contribution to one or more of the following areas; cost/value for money, time, environmental/sustainability, innovation, economic impact (i.e. created growth, jobs), impact on local area (i.e. significant/innovative consultation procedures or improvements within a local area/community) and delivered on the initial aims/targets. The project should have been implemented or substantially completed within the 12 months prior to January 2019.

Small Project of the Year

Awarded to the team responsible for delivery of a smaller scale project (less than £1m) within the United Kingdom relating to any highway, traffic or transport related project i.e. local safety schemes, capacity improvements, sustainable transport improvements etc. The project will need to show how it made a significant contribution to one or more of the following areas; cost/value for money, time, environmental /sustainability, innovation, impact on local area (i.e. significant/innovative consultation procedures or improvements within a local area/community) and delivered on initial aims/targets. The project should have been implemented or substantially completed within the 12 months prior to January 2019.

Environmental Sustainability Project of the Year

Awarded to the team responsible for delivery of a project which has made a significant positive impact on environmental and/or sustainability issues on a highways, traffic or transport related scheme within the United Kingdom. This could be relating to congestion reduction, reduced carbon emissions, reduced carbon footprint, local environmental benefits or sustainable materials used in construction. The project should have been implemented or substantially completed within the 12 months prior to January 2019.

Safety and Innovation Project of the Year

Awarded to a team, organisation or company responsible for the delivery of a project or product, within the United Kingdom, which has made a significant contribution to improving safety or has used a innovative approach/product on a highways, road safety, traffic or transport related project. This could include road safety education initiatives, local safety schemes, introduction of a new and innovative technology/product or use of safer working practices in construction i.e. traffic management. The project should have been implemented or substantially completed within the 12 Months prior to January 2019.

Highway Partnership Award

Awarded to the organisation(s) or Highway Authority(s) that have worked in a collaborative partnership to deliver significant benefits in terms of cost, time, sustainability, design, technology, procurement, innovation, knowledge sharing or benefits for local community within the United Kingdom. This could include partnerships between a group of Highway Authorities, partnership between private sector companies or private/public sector partnership. The partnerships must have been in effect in the 12 Months prior to January 2019.

Professional Review of the Year

This will be awarded to a person who has submitted a professional review of a particularly high standard within the Mercia Branch region. This can be for Engineering Technician, Incorporated Engineer or Chartered Engineer. Please note members cannot submit entries directly for this category and nominations will be taken from reviewers in conjunction with the IHE Membership Manager. The professional review will have been awarded within the 12 Months prior to January 2019.
